THAT is one of the reasons why it is hard to understand how L.B. Transfer cases are so low-priced.

Equipped with four toller bearings, the drawer glides open and shut with the ease of the drawer in an expensive file.

Again—the frame is made of heavy steel, electrically welded to the front and back. This construction makes the drawer super-strong to withstand severe handling. So sturdy are L.B. Steel transfer units that you can stack them as high as the ceiling. This al-

most doubles the capacity of your storage room.

Moreover, each drawer gives a full 26% inches
of filing space.

conference held yesterday in the o of Chief Collins.

While the meeting was called principally for corrections in the routings of busses plying between loop department stores and railroad stations, the discussion branched out to include also the two west side routes of the Chicago Motor Coach company busses.

It was announced that representatives for the bus company will appear tomorrow before the Illinois commerce

The commission suggested the Jack-son and Washington boulevard busses should avoid left turns at Jackson and Dearborn, and at Washington and La Salle, and operate in a straight line across the loop. Instead of doubling back on State street they would turn

north on Michigan avenue. Thus west side bus riders could transfer directly to north or south side busses.

The commission gave the motor coach company and the surface lines until Oct. 24 to comply with the order. Carson's Accept Plan.

After the conference in Chief Collins' office it was said that all depot busses would probably eliminate left hand turns east of Market street, and use by a right turn on Wabash avenue.

Representatives of the Carson, Pirie,
Scott & Co. bus line agreed at once
to reroute their busses to conform
with that plan. James D. Condon, representing the Chicago Motor Coach
company, said he thought the matter
of rerouting the company's depot
busses could easily be arranged.

By Thursday the teachers will have learned how the Board of Education stands in the controversy. At the meeting of the board tomorrow the trustees will vote on an amendment to the rules offered by the superintendent, which gives him power to organize and run the councils as he sees fit. Only three trustees have openly opposed the amendment and Supt. McAndrew is expected to have a majority in his favor.

Thus when the teachers line up against the superintendent Thursday they will most likely be at issue with the board itself.

### Thirty Thousand Dollar Oriental Rug

From a palace in Persia a marvelous silk rug has found its way to America. It is ten and a half feet wide and eighteen feet long. You can see it at Hovsep Nahigian's, on the second floor of the Mallers Building, Five South Wabash Avenue.

WO HUNDRED YEARS, and another hundred years, and maybe even four hundred years ago, an old weaver in old Persia tied the last knot in a wonder rug and saw his lifetime mirrored there.

Full twenty years he labored with patient hands and mind, thinking, singing, weaving an artist's dream in silk.

For none other could it have been woven but for kings, for dignitaries, to grace the floors of a palace, and even as then, that is its destined place today.

Truly a masterpiece. Its incomparable golden tones, its blues and greens, its mystery of design will send you into reveries to dream of the romance that has been and will be its part.

From Ispahan, from the land whose men and women it makes famous, it finds its way to America, to Chicago, and to Hovsep Nahigian's.

Here it starts another chapter, seeking another owner, ready to grace the floor of an appreciative home, to last and give pleasure to this and new generations for a thousand years, to grow in value as its fame and beauty increase.

You who love fine things, you who thrill to the magic of perfect workmanship, whether you can aspire to its ownership or not, you are urged, and are truly welcome, to come and view this incomparable masterpiece.

### SPAULDING & CO.'S STORE IS A TREASURE HOUSE OF GIFTS

That a gift from "Spauldings" has a significance and prestige is due to the fact that it always has been and always will be the policy of this house to maintain a quality in its merchandise that makes the giver satisfied and secures the appreciation of the recipient.

The reputation for worthwhile merchandise which Spaulding & Co. has earned does not mean that one must spend a large sum of money to be one of our customers.

Every department of our business displays satisfying selections of goods at prices which will surprise those who have thought that Spaulding & Co. sold only costly things.

"Spauldings" is a store for everyone who appreciates worthy merchandise and reasonable prices.

Our Buyers by careful searchings of the European and American markets have obtained for this season a really wonderful and fascinating collection of goods — and you will find that they cost less than you expect.

Because we are calling especial attention in our advertising to things of moderate price does not mean that we carry fewer of the more costly goods. We have not changed our character nor do we intend to. We are frankly endeavoring to increase our already large business by making more people acquainted with the scope of our stock.

One of our valued customers told us - "You owe it to the people of Chicago to tell them more about your wonderful store-why keep it a secret."

We ask you to read our advertisements but more than that we invite and urge you to pay us a visit and form your own opinion.

The Standard Oil Company (Indiana) is more than a vendor of petroleum products. It is an organization of service.

When we say that the Standard Oil Company (Indiana) is an organization of service, we mean much more than the everyday tangible service rendered our

customers through the manufacture, sale and delivery of oil products.

"Service" is a comprehensive term. It means anticipating the needs of the public and preparing to supply these needs when the demand comes.

The Standard Oil Company (Indiana) is laboring day after day to widen the sphere of usefulness occupied by the

sphere of usefulness occupied by the petroleum industry.

It is broadening the field of service which oil products offer to humanity. It is extending the application of exact science in this most fundamental of all modern industries. It carries on contin-uously a search for knowledge which shall be of value to society. In carrying on this great work, it

calls upon human ability in every field; it seizes upon the most daring ideas and labors to make them prac-

tical through unceasing effort.

Problems which presented seemingly insuperable difficulties have been overcome-limitations which threatened to hamper the development of the industry have been removed.

Improvements in refining, marketing and distribution have been developed. perfected and put into daily operation.

Yet, this is but part of the great service rendered by the Standard Oil Company (Indiana).

This generation scarcely can appreciate the role which oil will play in the future. Anticipating the demands which will be made upon it, the Standard Oil Company (Indiana) is attracting to its ranks, men with the training, knowledge, vision and enthusiasm necessary to pioneer in the development of the petroleum industry as it will be tomorrow and in the days to come.

The core of Standard Oil Service is in the keen minds of the men who labor in the laboratory and the workshopunseen and unnoted by the public. It is this part of the organization which has enabled the Company to render so complete a service to society.

Here a host of perplexing problems

are taken-problems of manufacture, problems of application, and problems of effectiveness-and each is studied, worked upon and solved, that the patrons of the Standard Oil Company (Indiana) may get the greatest value for the money they spend.

WASHINGTON.—Secretary of War Stanton announced that Gen. Sheridan reported he is still pursuing the rebels in the Shenandcah valley. The rebels made a stand at Flint hill, a strongly entrenched position beyond Strasburg, and were attacked by the Union forces. The works were carried and held by the Union troops. "There is reason to believe," Secretary Stanton's report continues, "that later dispatches from Gen. Speridan were captured by Mosby near Winchester. Gen. Stevenson reports that Gen. These, and a woman talking And a climbing child— So wild!

I never have heard the wind blow With such a piteous sound— Och! but it's cold and lonely Huddled here on the ground .

ANSWEE.
Chicago, Sept. 1;.—For educational purposes I would like to suggest a competitive answer to the following questions:
Why have the people of the United States made more progress towards bettering their material condition than any

other country?
Why is it that our people, generally speaking, are better housed, better fed, better clothed, and we have less poverty than any other country? This question does not mean to convey the period since the war, solely but since our beginning

as a nation.

There are other countries which possess more territory-many of them more fertile soil-their industrial activities is fertile soli—their industrial activities in many instances are much more intensive. Their agricultural pursuits are more thorough—they have had many more years of governmental experimentation. Their laws do not seem to cicumstribe opportunity any more than ours—their incentive is just as pronounced and their prizes to the successful are just as great. Yet with all the disadvantage (if we might call them so) of an ignorant horde of immigrants, the conglomerate mixture of different nationalities. The extreme lawlessness which pervade, and many other incongruities and short-comings we have been the most progressive nation in the material welfare of mankind since the period of man's adelescence.

It is argued that on account of the congested population of European countries, that the opportunity for the individual is not as pronounced. We disprove this in that our congested districts

prove this in that our congested districts (the cities) are more prosperous than the villages, also I might cite, to dispress this contention that Germany before the war showed that a populous county could be made prosperous.

The United States has continued her material prosperity, with the exception of a few periods of inconsequential depressions, since its inciplency.

There must be some fundamental cause, and we would like to hear from the multitude the reason why.

### The New Things to Know about Linoleum Floors

Linoleum, its colors, and the way it is made are all worked out around these ideas:

First: that a floor of Armstrong's Linoleum shall be bought for its beauty; Second: that it shall be laid

for permanency;
Third: that it shall be waxed and kept new-looking and good-looking.

For over fifty years, business men have used linoleum because it is quiet, economical, and easy to clean.

Today they expect more of lino-leum. They look to Armstrong's Linoleum for beauty and dignity of color and design. They arrange to have their fine linoleum floors laid the way merchants and contractors who feature Armstrong's Linoleum recommend. And when these floors are laid, they wax their floors regu-larly because waxing not only im-proves the looks of linoleum and protects it for years of wear, but because waxing is also the low-cost, easy way to keep a linoleum floor

THE designs of Armstrong's clean, sanitary, and good-looking. Laying linoleum over wood

The new way of laying linoleum is to cement it in place over a lining of builders' deadening felt which has been pasted to the underfloor. The linoleum is pasted to the felt, joined closely, so that there is no break in the design, and waterproof cement is used round all edges and seams.

The finished floor is permanent, smooth, and tight, and will not stretch or crack. Also, if for any reason the linoleum should be taken up, the underfloor is entirely unmarred and as good as ever.

The low cost and fine results of waxing linoleum floors

### THE

T might surprise you to know," writes a patron of our motor coaches, "that since riding on the upper deck of your coaches this past Spring and Summer, my appetite has improved immeasurably and I have a far keener appreciation of the beauties of our parks and boulevards."

Seventy million ride through the parks to and from work

The improved appetite is no surprise to us. Pure air is a panacea for many of "the ills that human flesh is heir to." Physicians prescribe it oftener than medicine. And you never fail to find it on the top deck of the motor coach.

Moreover, what there is to see can readily be seen from that point of vantage. It is similar to a top seat in the grandstand from whence you command a clear and comprehensive view of the field. As a matter of fact, we have countless letters from patrons thanking us for the chance we

have given them to ride to and from their work in pure, fresh

And it is likewise true that thousands of Chicago people have learned far more of the beauties of the parks and boulevards since patronizing the coaches, than they ever knew before.

To ride to and from work along the smooth, expansive boulevards, and through the tree and flower-trimmed avenues of the parks is a luxury, that thousands never enjoyed until the motor coach arrived, and we haven't the least doubt that it adds color to the day and color to the cheeks.

Isn't the motor coach constructive in the work it is doing? Inasmuch as it gives pleasure and satisfactionpossibly health-to millions, hasn't it become a great factor in modern Chicago

### "We should have said in the World's Prosperity"

Of Prosperity

Secretary Mellon

Says:

"The whole

situation looks very

promising"

To a great extent the rise and fall of our nation's prosperity is in proportion to the prosperity within the Great Central Market.

in the Nation's Prosperity

Concentrated within the relatively narrow

radius of a few hundred miles. is the might of the greatest nation in the world's history.

This market, of which Chicago is the hub, is made up of five of this country's most efficient industrial and agricultural states-Illinois, Indiana, Iowa, Michigan and Wisconsin.

The Great Central Market produces wealth in abundance-raw materials above and below the soil, and finished products for family

home and farm, all of which rapidly pass by water, rail and highway into the markets of the nation and the world.

The Great Central Market with its more than a hundred million acres of improved farm lands, tilled by the brainiest farmers

in America; its more than fifty thousand manufacturing plants, operated by over a million and a half skilled workers, contributes the lion's share of wealth and prosperity to the nation.

> The rapid progress civilization has made in the Great Central Market, in which live more than four million thrifty families, has brought a change in the list of life's necessities. Among these the Automobile long since has taken its permanent place.

In 1920 this section supported over three million motor vehicles, In 1923 the figures leaped to over five

million—and 1924 will send the total several hundred thousand higher.

This Great Central Market, with its bountiful harvests and whirring factory wheels, owes its amazing prosperity mainly to the transportation enjoyed by those who live within its borders.

There are exceptions to this rule.

With volume and through scientific manufacturing and distribution, a few products have created a force that serves like an iron roof, holding the price down.

Coca-Cola is one of them.

CONTRACTOR OF THE When Coca-Cola was put on the market in 1886, the popular, convenient coin, 5c, was adequate to pay for ingredients of the highest quality.

Then prices steadily rose. But the 5c price made Coca-Cola a quick seller. And Coca-Cola would not be Coca-Cola with cheaper ingredients. There was begun an effort that has proved far-reaching - to maintain the highest possible quality in a beverage at the 5c price.

Coca-Cola was steadily gaining in volume. This volume made possible the most modern manufacturing methods-with the precision, perfect sanitation and labor-saving of

The same efficiency was applied to distribution. Fourteen regional factories were built

to assure quick deliveries and cut freight cost to a minimum. Twenty-four strategic hundred jobbers with floor stocks were added to the organization. Twelve hundred and fifty Coca-Cola bottling plants in as many cities were built.

And now! The dollar is worth only about half what it was in 1886, but the nickel still buys the highest quality in a beverage.

Except for tremendous volume and established distribution, it would be impossible for a beverage of this quality to be sold at such a price.

The matter of price maintenance, of course, is voluntary on the part of retailers. The courts have so held. But among the 415,000 Coca-Cola retailers the conviction is established, because the facts prove it right, that the 5c price gives a volume and turnover with greater profits than would a higher price.

Suppose the pure products from nature and nine sunny climes that are blended in Coca-Cola were gathered for a single glass, the beverage prepared and served to you icecold, "delicious and refreshing!". It would cost a fortune.

But backed by the great industry that it is, the millions of glasses and bottles of Coca-Cola are sold at 5c each.

### The brush is the thing!

Choose from the many reliable tooth powders, pastes or liquids, but remember, the brush is the thing

THERE are many brushes, but the Pro-phy- 5 lactic is the correct tooth brush. The eight features listed below are what make it different from any other brush and the reasons why it is used in all parts of the civilized world.

- The large end tuft reaches and cleans the backs of the back teeth and the inside ourfaces of all teeth-originated by the Prophy-lac-tic Tooth Brush.
- 2 Saw-tooth bristle tufts arranged to fit the 'profile" of the teeth—originated by the Pro-phy-lac-tic Tooth Brush.
- The curved handle, with the tapered and beveled head, which enables the Pro-phylactic to get behind the teeth and to clean all teeth—originated by the Pro-phy-lac-tic
- Dependable markings on each brush, so you may rely absolutely on getting hard, medium or soft bristles - originated by the Pro-phy-lac-tic Tooth Brush.

- The use of a symbol to mark each brush so that every individual may know his own Pro-phy-lac-tic -originated by the Pro-phylactic Tooth Brush.
- The hole in the handle and the hook to hang the brush upon—originated by the Pro-phy-lac-tic Tooth Brush.
- The sanitary yellow box which brings your tooth brush to you clean, untouched by any hands since it left the sanitary Prophy-lactic factory - originated by the Pro-phy-lactic Tooth Brush.
- Made in America by Americans originated by the Pro-phy-lac-tic Tooth Brush. You can now get a Pro-phy-lac-tic Tooth Brush, the world's standard, in any civilized community on earth. The three sizes are priced in the United States: Pro-phy-lac-tic Adult, 50c; Pro-phy-lac-tic Small, 40c; Pro-phy-lac-tic Baby, 25c. Made with hard, medium, or soft Pro-phy-lac-tic Brush Co.,

# olve that entrance hall problem for all time

THE most used and most abused floor in the house is the entrance hall—it must stand the brunt of constant coming and going. Tracked mud and dust, dripping garments and umbrellas are the despair of the careful housekeeper with ordinary floors. More and more are turning to Blabon floors, to end their troubles. The very nature of linoleum makes it impervious to dirt and moisture. It is resilient and quiet, being composed largely of ground cork and oxidized linseed oil, which is somewhat similar in its consistency to rubber.

Blabon's Linoleum lies flat. Its smooth, crackless, splinterless surface can be quickly wiped clean and dry with a damp cloth. An occasional waxing and polishing preserves the freshness and beauty of its colors and patterns.

There are many rooms in the house which could be greatly improved by a Blabon floor, and there are other floor areas, closets, garrets, etc., where Blabon Printed Linoleums, even less in cost, may be used to advantage. Booklet showing 22 characteristic patterns in color mailed free, on request.

The right way to lay linoleum is to cement it over a layer of builder's deadening felt paper, which should first be pasted to the floor with linoleum paste. This overcomes building and stretching, makes the seams watertight and practically invisible, and prolongs the life of the floor.

Look for the Blabon label and ask for Blabon's Lincleum by name. It is sold y good home-furnishing and department stores. If your dealer hasn't it, write his name and we will see that you are supplied.

as a market for Bonds

In Gleveland this morning—across breakfast tables at the Statler, Cleveland and Hollenden hotels—the common subject of conversation is . . . . bonds . . . . new issues . . . . new markets . . . . the potentialities of certain markets.

Men from all sections of the country have gathered for the Thirteenth Convention of the Investment Bankers' Association of America.

Whether you are an investment banker attending the convention or reading this in your own home paper, you will be interested in the 49th State as a market for bonds; its tremendous purchasing power and the facilities here for marketing securities.

The 49th State—a great new commonwealth spreading out 150 miles in every direction from St. Louis, its capital, is the financial heart of the prosperous Eighth Federal Reserve

Here is an attractive market for your offerings, a naturally concentrated, accessible area with more than 4,500,000 people. Population exceeded only by the states of New York. neylvania, Illinois and Ohio. A territory undergoing a definite evolution, and becoming more and more an indus-

Here is great wealth without great extremes of wealth. Wealth based upon a wider variety of natural resources and industry than any other state can show. -

And here are exceptional facilities for marketing securities.

1,873 banks serve the 1,111,000 families of the 49th State. providing a distributing system for your offerings covering every town and community. The majority of these banks not only know how to sell but are selling bonds.

Potentialities of Market Revealed to Investment Bankers by Globe-Democrat Analysis

The St. Louis Globe-Democrat-St. Louis' Largest Dailyhas made the first complete analysis of the 49th State as a market for bonds. The results disclose the magnitude of the opportunities for the sale of securities.

Questionnaires were mailed to the 1,873 banks in the 49th State. Based upon the number which in each case replied to the question asked-

58.6% now sell securities. Those who do not sell securities represent future potential retail distributors of bonds.

26% of those not selling securities have already stated that they plan to do so.

95.6% do not specialize in the securities of any one investment house exclusively. These banks are open to solicitation.

Only 38.5% now obtain personal sales help, advertising or circularizing help from investment houses. 49th State bankers want this help. There's business here for those who will give it.

88.5% do not underwrite bonds and mortenges These banks are not underwriters, therefore they have no preference for securities of their own. The market is open to the Investment Bank seeking to interest local bankers in retailing its securities.

The 49th State is a receptive market for your securities. A market that will absorb many times its present yearly total. One in which "consumer demand" can be quickly created and "dealer acceptance" quickly won-at low cost-through one medium-The St. Louis Globe-Democrat.

> Financial Advertising Lineage of the St. Louis Newspapers (July 1, 1923, to June 30, 1924, inclusive)

(Excess of the Globe-Democrat over all other St. Louis newspapers combined—138,895 lines.) More Financial Advertising Than All Other St. Louis Newspapers Combined

The Globe-Democrat, a great morning and Sunday newspaper, carries more financial advertising than all other St. Louis newspapers combined. More than twice as much as the first evening paper.

The Globe-Democrat has distribution among the known buyers of bonds—a contact not shared by any newspaper in

It is read by one or more officials in 80.1% of the 49th State banks. By the president himself in 78.2% of these banks.

When the 49th State bankers were asked, "Other things being equal, would you be favorable to securities advertised in the St. Louis Globe-Democrat by responsible Investment Bankers, listing your name in their advertisements as the distributor in your community?"—68.5% of those who replied answered, "Yes."

The Globe-Democrat is the big influence in its field. The acknowledged financial guide. Bought and read for its market and financial news. Complete news. Authentic news. Studied by bankers. Always first choice as a medium for offerings, and in most cases the only choice.

You will be interested in the complete results of the Globe-Democrat's analysis of this territory as a market for bonds sent on request.

The analysis covered the entire Eighth Federal Reserve District, of which St. Louis is the lea metropolis and the St. Louis Globe-Democrat the leading newspaper.

It is interesting to note that the results for the 19th State exactly parallel those of the Eighth Federal Reserve District.

The Research Division and the Sales and Promotion Departments of this great newspaper can render valuable assistance to Investment Bankers desiring to introduce their offerings to the great army of investors in the 49th State and the Eighth Federal Reserve District. They are at your service.

# Chicago Tribune Advertising is always a bargain because circulation leaps up and up!

Advertisers contract for space in The Chicago Tribune on a basis of past circulation. But before the space has been used circulation gains give them more than they contracted for.

Consider, for instance, how the net paid circulation in August of each year has exceeded that of the preceding year-except in War Time-1917:

Mrs. Morran Schuyler, one of New York's leading philanthropic and social lights, advertises for a young woman to work in her apartment mornings. The advertisement is answered by a girl evidently of birth and breeding. In spite of the fact that she admits a pair to hide her identity, Mrs. Schuyler accepts her on trust and tags her with the name

THAT LITTLE EPISODE. The surprising element in Hope's situation was that a woman of Mrs. huyler's type, admittedly not only just but generous, and certainly with a od grasp of present day labor conditions, should so overwhelm her. The verage woman as well as the average man would naturally get out of any oyé all that employé was willing to give. But Mrs. Morgan Schuyler was set an average woman. She had struggled with today's service problem, and, ne most of her sisters, had falled to meet it, as she had confessed this morn Tet, having found that rare flower, a willing worker, she was now cheerfully prepared to drive the willing worker to the breaking point. She rather liked the flapper, though she didn't like the reckless look on that young face, or the girl's tired eyes, or the didn't like the reckless look on that young face, or the girl's tired eyes, or the rouge on her cheeks and lips, or her ribbon tipped cigarets. When Sally departed and peace settled over the household she had liked the study, with its He discovered that it took all kinds or living to make a life and that this French windows and small balconies overhanging the street; its rich, dark coloring, its book lined walls. It was a study that called aloud for a student, and it was as different from Mrs. Schuyler's bedroom as that lady herself was different at home and abroad; in fact, the entire Schuyler apartment, with the one hectic exception of the pink bedroom, was furnished in excellent taste. Hope subsequently learned that the taste was the late Morgan Schuyler's. It was he who planned the study and selected the beautiful appointments of the dining room and living room. A portrait of him hung in the main hall, revening him as a broad shouldered, smooth faced, bald headed man, with a twinkle in his gray eyes. It was a generally blonde family she had come into, Hope and Kawa and Nancy seemed the only brunettes.

The luncheon was a quiet one. Mrs. Schuyler was obviously tired, after much talking at her committee meeting, and Hepe lent herself to the crowding impressions that presented themselves in her new environment.

Mrs. Schuyler spoke abruptly.

"What time did Sally leave?"

"About half-past eleven, I should say."

"What time did Sally leave?"

"About half-past eleven, I should say."

"Did her mother telephone this morning to ask if Sally was here?"

"Yes, about a quarter of twelve."

"She'll probably telephone again about dinner time, and the chances are I'll be roused from my innocent slumbers at midnight to tell Grace Wallis I haven't the faintest idea where her offspring is. Grace seems to think I have a leash on the imp," she added, "whereas all I know about Sally is that she's riding for a fall and a hard one." ng for a fall and a hard one."

riding for a fall and a hard one."

"Has she a father?"

"Yes, she has, an utterly selfish, self-absorbed creature. He pays no attention whatever to Sally, who's the only child, and Grace has about as much discipline as a sick kitten. Her one idea of her duty to a daughter is to know where she is. Of course, she never does know, though she spends her time telephoning to her friends asking if they've seen Sally lately. Sally goes her own way, poor child, with what she calls 'the bunch,' a group of youngsters on her set who are as foolish and as irresponsible as she is. Jim tries to keep an eye on her, but he hasn't much more sense than Sally, so I don't think he really helps."

"My son James," Mrs. Van Dorn contributed, "is an unusually sensible young man. Of course, he hasn't Bertle's strength of character—"

"If Jim's sensible it's your secret, mother. No one else knows it. Jim is an unusual young idiot, if you ask me," Jim's candid sister went on helping herself to Spanish cream and regardless of the black cloud that enveloped kawa. "He makes love to every girl he sees, and his victims are strewn around so thick he can hardly move without stepping on some of them!"

"Maud Schuyler!"

"Mand Schuyler!"

Mrs. Van Dorn drew herself up in her chair and frowned at her daughter.

"Well, it's true," the latter insisted. She added impatiently, "If it's Miss Emerson you're thinking about she'll learn it soon enough. I don't blame impatiently in the second of the second o

"If only he'd marry some nice girl," she murmured without hope.

Mrs. Schuyler laughed sardonically. The secretary realized that there we unpleasant aspects of this big, tolerant, efficient, babyish, pessimistic, ust personality. She had yet to see them in action, but she recognized their stance. She was given her first glimpse of one immediately after luncheon if recalled to a matter she had forgotten, her employer followed her into the shall leading to Hope's room.

"I won't keep you a moment," she said brusquely. "I know your time's and you're off duty. But I want to speak of that little episode this ning."

"That little episode?" The girl faced her with head erect and brown eyes dilly meeting the round blue ones.

"Yes. Of course, I realize that the collision itself was an accident." Mrs. laylor went on, "but the little chat that followed wasn't—was it?"

"Your brother insisted on showing me my room," Hope explained. "You I didn't know where it was."
"He would." Mrs. Schuyler conceded. "You will find that he's clever at ting and grasping opportunities. I simply want to repeat—" she began her platform manner.

"You needn't."

In THE TRIBUNE of Sept. 19 a reference is made to Paul Kruser, who, according to the article, was to have been allied with the Oberammergau players. Mrs. Marie Moyer Becker, 6225 South Troy street, asserts that as an erstwhile resident of Oberammergau she was well acquainted with all of the players and that none were ever mamed Paul Kruser.

The acting of "The Swan," as I have indicated, is the play had in its New-York run in the case of two changes in the cast, involving Miss Watson and Mr. Owen. Appropriate adjectives for the players way with the comedy are sensitive intelligent, communicative, and obedient,—and the best of these is the last, I should say, for I've a cheer and a bow for David Burton, who staged the play.

Notre Dame Goes East.

But the game which will overshadow all others to be played on the first Saturday of next month is the Illinois-Nebraska struggle at Lincoln. The Orange and Blue, as most fans know, tied with Michigan last year for the Big Ten title, while the Cornhuskers had as good a claim to the championship of the Missouri Valley conference as any eleven. In fact, Nebraska and Kansas were rated about on a par by critics of the section. struggle is generally looked upon as among the most important intersectional combats of the year, and each team is sent into the tray with instructions to use everything.

The big struggle on Oct. 25 will

Players were shot into the fray at short intervals and stayed until they committed some misplay which did not meet with the approval of the coaches. In some cases a few of the men remained in the scrimmage throughout most of the session.

Ralph Baker, who is out for the varsity for the first time made a favorable impression. He returned punts for good distances; his plunges picked up yardage, and his kicking and punting brought good results.

Capt. Bob Wienecke shared the spotlight with Baker. Whenever Baker succeeded in cluding the other men on his return of punts, it usually was Wienecke who brought him down.

History: The Company started in the latter part of 1906 with a capital of approximately \$100,000, and has attained its pres-

ent favorable position entirely from earnings. Since its incorporation more than \$2,000,000 has been paid in dividends and the net worth has been built up to over \$2,800,000.

Business: The Company is engaged in the manufacture and repair of wood and steel railroad freight cars, steel underframes, pressed steel parts and forgings for railroads. Its customers are practically all of the railroads

Property: The two plants at Hegewisch, Chicago, Illinois, covering 80 acres, have an annual capacity to build and repair about 8,000 cars and make 10,000 tons of forgings, steel parts and miscellaneous tonnage. They are completely equipped with modern buildings, machinery, tracks, etc., for the most efficient and economical operations. The very favorable loca-

\$175,000 1 MORTGAGE SERIAL GOLD BONDS

SEVEN PER CENT with safety these days means that here you can profit by an outstanding and most valuable service—a service which only a House having a complete real estate organization can be in position to render. Benefit by it while you can.

COMPARE these 7% bonds as to safety with any other bonds ever sold and in fairness to yourself you will be bound to admit that they are as sound and secure as bonds possibly can be made. In the face of declining interest rates, isn't it then the part of common sense to get 7 per cent—while you can?

Look at this building. Its forty-eight apartments are modern and of the medium size that Oak Park needs so much today. Some rent as low as \$67.50. The entire building will earn nearly four times the bond interest.

### Such Earnings Mean Safety

Just remember that under our system of mortgaging these earnings are mortgaged just as surely as the land and building. So you can't get away from the fact that these bonds afford you an extremely high degree of security, while the 7 per cent feature means a good extra profit in your pocket.

Seven per cent and safety is what this House is still able to offer you because its organization serves building owners not only through its loan department but in many other ways that profit them. Serving them better means that we can serve you better.

### Seasoned Industrial Securities for Profitable Investment

By John Burnham & Co., Inc.

Last week we presented a list of established Middle West corporations whose success warranted the purchase of their securities.

Today we offer another selected list of varied industries from which a profitable choice may be made to appeal to the requirements of individual investors.

### The Ryan Car Company

Established in 1906 and incorporated in Illinois, this company is engaged in the manufacture and repair of wood and steel freight cars, steel underframes, pressed steel parts and forgings for railroads. Among its customers are practically all of the railroads entering Chicago. Inventory and bad debt losses are practically unknown.

The dependable earning power of the company is amply demonstrated by its past dividend record, over \$2,000,000 having been distributed in the past eighteen years. The original capital of the company, approximately \$100,000, has been increased entirely from earnings and now represents a net worth of over \$2,800,000. The common stock has a book value of over \$29.00 and the ratio of current assets to current liabilities is over 5 to 1. The directors contemplate a dividend of \$2.50 per annum, which at \$28.50 will return a yield of 8.75%. Application will be made to list on the Chicago Stock Exchange.

### Albert Pick & Co.

Incorporated in Illinois in 1896, succeeding co-partnership established in 1857. Is today the largest house in the United States catering to the complete equipment of hotels, restaurants, confectioners, dining cars, colleges, hospitals, etc., supplying chiefly furniture, carpets, linens, glassware, etc. In 1919 acquired Burley & Company of Chicago and E. H. H. Smith Silverware Company of Bridgeport, Conn.

Capitalization consists of \$3,216,200 of 7% preferred stock, which is one of the attractive Illinois Tax Exempt issues widely held by Chicago investors; also \$2,996,830 of common stock which is paying dividends and is listed on the Chicago Stock Exchange. The success of the business is indicated by the steady growth in net earnings from \$489.835 in 1917 to \$1,006,124 in 1924, for fiscal years ended January 31. Total assets of the company are over \$15,000,000.

### Montgomery Ward & Co., Inc.

Incorporated in Illinois, the business was established in 1872, and was the first concern to engage extensively in the catalogue and mail order business. The company's customers are found in every state of the Union, in Canada and many other parts of the world. It owns real estate and warehouses in Chicago, Portland, Oregon, Kansas City, Fort Worth, St. Paul and other cities.

Net sales for the year 1923 were \$135,300,000 and for the first eight months of 1924 amounted to more than \$94,000,000. an increase of 171/2% over the corresponding period of last year. The capitalization of the company consists of \$4,249,800 of 7% preferred, 205,000 shares of Class "A," entitled to \$7.00 per share cumulative dividends, and 1,141,251 shares of common stock. The preferred and common stocks are listed on the New York and Chicago Stock Exchange and the Class "A" stock on the Chicago Stock Exchange.

The securities of the foregoing corporations are attractive for their income return and possibilities. The earning power of each has been demonstrated and indicates continued prosperity.

We shall be glad to consult with you regarding their purchase and to supply any additional information desired either by telephone (Randolph 3446) or by mail.

> Our advertisement of next Tuesday will present another list of sound Middle West corporations whose securities we recommend for investment.

The Elements of Safety in Real Estate Investments

Are Easy to Understand and Impossible to Question

Shelter is a vital necessity of mankind-

The need for buildings in which to live and to work has established the values of improved real estate on a solid foundation. Especially is this true in large cities where the history of such values is one of steady, unhesitating increase.

When land and a modern income-producing building are piedged to secure a loan of reasonable proportions, the form of security is ideal. It cannot disappear. Title to the land is guaranteed and the building is insured against all normal risks. The income of the building is used first to meet the requirements of the loan.

The earning power of improved real estate is most dependable, for certainly money will be paid for shelter before it will be spent for railroad tickets, street car fare, telephoning, electric or gas bills or almost any other commodity except food.

The Birchwood Beach Apartments are just off Sheridan Road in a residential section having no superior in Chicago. The location combines the delights of the beach and the convenience of splendid transportation.
While distinctive in architecture and of very high-grade construction, its owners have built the Birchwood Beach with the idea of offering its apartments at moderate rentals. Only such buildings secure Cochran & McCluer bond issues. For this Chicago Investment Institution has always avoided as security apartments of the high rental type and all specialized properties where incomes are unreliable. It is this conservative policy that is responsible for a record of 43 years 100% Safe—never a foreclosure on a bond issue.

LONDON WOOL AUCTION.
LONDON, Sept. 22—A superior selection
amounting to 7,683 bales was offered at
the wool sales today. There was a spirited
demand for fine grades, which were firm, but
medium scoured was slow and irregular and
there were frequent withdrawals.

### Yankee Newspaper Man Takes Exclusive Photos of Chinese Troops and Refugees in Shanghai Area

PERFECT. Master James Robert Craycroft, whose parents live in Decatur, was adjudged 100 per cent perfect in baby show at the Illinois State fair.

PARTS REVERSED. Policemen Patrick J. Quinn takes part in raid on hotel at 642 Dole avenue and is in turn arrested on warrant sworn out by owner. Quinn's daughter is shown with him.

REFUGEES SEEK SAFETY IN CHINESE WAR. Prightened civilians are shown rushing for a train at Soochow, a city in the battle area. For days after the outbreak of hostilities trains were packed with fleeing folk.

SUED BY WIFE. Edward F. Swift Jr., is charged with cruelty in divorce suit.

SEEKS DIVORCE. Mrs. Marion Atchison Swift alleger that the son of the meat packer has ill treated her, even knocking her down during a quarrel.

[Money Prote] (Story on page fee.)

CHEKIANG TROOPS DEFEND SHANGHAL. At the risk of his life an American newspaperman took these two pictures. He mapped them in the war some 15 miles from the Chinese city. While returning to that place he was twice arroted and searched. He managed to hide the roll of films.

(Story on page 1999)

OFF TO QUAKER TOWN. The Chicago police department baseball team leaves for the east to cross bats with the Philadelphia blue coats. The Chicagoans are to wear uniforms donated by County Treasurer Patrick J. Carr.

PAYING TRIBUTE TO LINCOLN. Members of the Negro race took part yesterday in celebration of the anniversary of Emancipation day. The exercises were held at the foot of St. Gauden's statue of Lincoln in Lincoln park. Those in the photo are civil war veterans. At the extreme right is Gen. James C. Stuart. (Stery on page thirteen.)

New York, called "the Billy Sunday of music," has been hired to sell the Chicago Civic opera to Chicago's masses (Stary on page twenty-one.)

NOT FOR SALE. Stained glass window on staircase in Jacob Franks home is one of the few articles not offered at auction. Likeness of Franks children is on window.

(Story on page sine.)

TRYING HUNDREDS OF SPEEDERS. Judge Schulman, sitting in one of the Speeders' courts yesterday, heard the cases of 623 persons arrested for violating the speed laws. Police are maintaining their drive to enforce the letter of the law with great vigor and each day brings hundreds of arrests. (Story on page 1992)
